Re: Support for 102,850 Square Foot Long Beach Airport Terminal Remodel

Dear Mayor, Council Members and EIR members

I had the worst experience during recent weather related delays on January 2, 2006. The airport terminal was packed with people. No place to seat for hours, long lines at the bathrooms and the so called food concession. This is not only an unhealthy environment, but god forbid if there was a fire or need for evacuation, there would have been a

disaster. I am surprised the city fire marshal did not cite the airport for overcapacity at the passenger holding facility.

Long Beach airport is fast becoming a popular airport. I am sure it is bringing a wealth of cash to the city. Maybe the city does not need the money. I live 10 minutes from the John Wayne airport, but I rather use the Long Beach airport as it offers me direct flights to east coast. I love the small airport environment, however there is a certain need to provide more passenger facilities.

I support an improved airport terminal project that will provide adequate terminal space and parking while reducing air pollution and traffic congestion. I agree with the Long Beach Alliance position that the 102,850 square foot terminal with 14 airplane parking positions is the minimum size needed to accommodate the current and future passenger loads.

It is my hope that the City Council actively supports the current Environmental Impact Report (EIR) timeline and avoids further delays. It is time push forward the plan for an improved terminal building at the EIR recommended size of 102,850 square feet.

Sincerely,

Kamran Dadsetan
